

# world-class energy research in the Midlands Energy Consortium

**14 September 2010, 9.00am – 3.30pm**

The Nicholson Building, The University of Birmingham

A showcase of the extensive and complementary transport-related research activities of the three world-class universities brought together by the Midlands Energy Consortium.

Featured themed presentations on:

- **Energy efficiency in transport**
- **Alternative fuels**
- **Future resilient transport networks**

**Opening speaker:** Helen Woolston, Transport for London

## The Midlands Energy Consortium

The Consortium is host to the Energy Technologies Institute (ETI), a unique public-private partnership aimed at accelerating the deployment of new low-carbon technologies. The Consortium has a deep reservoir of talent, ideas and skills with which to contribute to the successful development of low-carbon technologies.

### Further information

**Dr Helen Turner Consortium Manager**  
T: 01509 228494 E: b.patel@lboro.ac.uk

### Venue:

**The Nicholson Building** is situated close to the acclaimed University of Birmingham's Edgbaston campus, just 10 minutes from Birmingham city centre and just 10 minutes walk from the University train station.

### Registration

To register in advance to attend this free event please contact Bhavna Patel.
